MAURO ARTUSIO Italy

Ketchup bottle

Made of metal and thermoplastic resins, Mario Artusio's ketchup bottle was a prize winner in the Milan-based Premio Macef Young Designers competition in September. Influenced by the classic oil canister, this vessel lubricates food instead.

Via San Martino 10, 12064 La Morra (CN), Italy

SILVIA COGO Italy

Pinik

Silvia Cogo's porcelain plate and glass set won her a prize at the Milan-based Premio Macef Young Designers contest in September. The range is intended to be a humorous reference to disposable picnic sets, where plastic was once used to imitate china in the production of kitchenware.
